OUR CERTIFICATIONS

MicroSeptic is an antimicrobial technology used on the surface and backing of our products. The antimicrobial agent present in our mats neutralizes 99.9% of bacterial proliferation.

NFSI certifies the resistance to slips on wet surfaces.

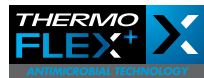

CRI Green Label Plus certifies products with a low-rate emission of volatile organic components. (VOC)

OUR TECHNOLOGIES

The best vinyl in the industry specially formulated with nitrile rubber! With its incomparable qualities in terms of floor adhesion and antimicrobial properties, no other vinyl has as much to offer as our ThermoGrip vinyl.

Our ThermoFlex+ vinyl backing offers superior durability compared to industry standards, providing you many years of service. Its backing has an antimicrobial technology that neutralizes 99.9% of bacterial growth.

Our ThermoFlex vinyl backing offers superior durability compared to industry standards, providing you many years of service.

Premium quality foam specially developed for increased durability and effective relief of musculoskeletal pain.

In addition to offering a patented superior quality anti-fatigue foam, our Zedlan Plus neutralizes up to 99.9% of bacteria proliferation. Its natural composition also provides antistatic protection of 10⁹ ohms.

When this warranty applies, Mat Tech agrees to replace the mat(s) if the customer is not completely satisfied within 3 years from the date of purchase.

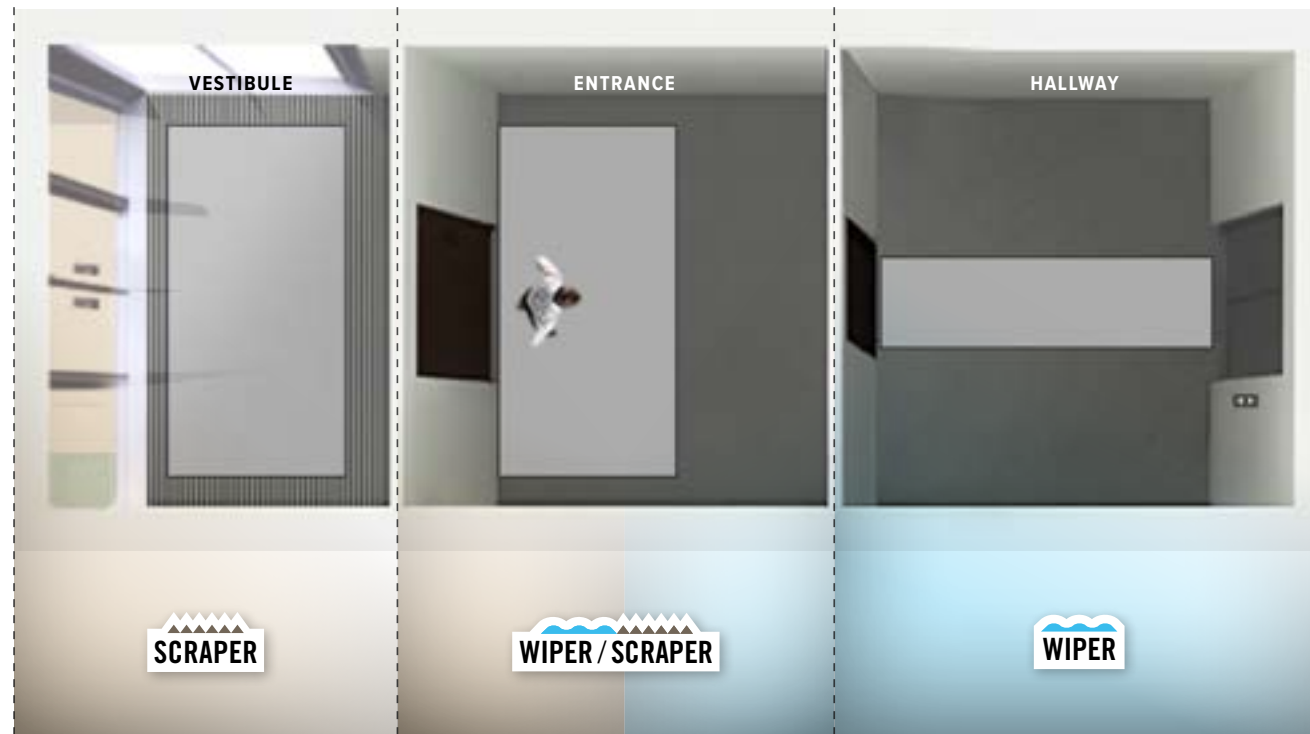

Our exclusive Microfiber technology optimizes the retention of moisture and dust thanks to its high positive static charge.

ENTRANCE MATTING
SPECIALIST

HOW TO CHOOSE THE RIGHT ENTRANCE MAT

ENTRANCE MAT SELECTOR

Identify the following symbols while browsing the catalog to find the right mat for you.

- For outdoor/indoor entrance and vestibule
- Scrapes and traps dirt/salt which prevents it from entering the building

- For indoor entrance
- Removes debris from shoes and retains water to keep entrances clean

- For indoor areas
- Absorbs water to keep hallways dry and safe

ERGONOMIC MATTING

ERGONOMIC MATTING
SPECIALIST

PREVENTS MUSCLE FATIGUE

HOW IT WORKS

Flexibility

Allows proper weight distribution while reducing the impact on joints and permitting a more natural position while diminishing stress on pressure points.

Support

Provides resilience and bounce. As the worker's foot presses into the mat, the mat's foam pushes back against the foot preventing blood from stagnating and enabling the return of energy.

Prevents compressed muscles due to a constant state of contraction

Stimulates blood circulation from compressed blood vessels

Reduces tension in the back and spine from static movements

Prevents stress on the feet and joints due to a prolonged standing position

WHAT IS ZEDLAN ?

OUR ZEDLAN PRODUCTS OFFER INCOMPARABLE ADVANTAGES:

More energy !

Our Zedlan Foam offers three times the bounce of traditional anti-fatigue products

Increased durability !

Our Zedlan Foam outwears similar products by nearly three to one

Less slips and falls !

Our Zedlan Foam offers superior traction compared to standard foam products

Extreme flexibility !

Our Zedlan Foam conserves its anti-fatigue properties, even under freezing temperatures

Zedlan Plus

In addition to offering a patented superior quality anti-fatigue foam, our Zedlan Plus neutralizes up to 99.9% of bacteria proliferation. Its exclusive composition also provides an antistatic protection of 10⁹ ohms.

COMFORT KING ANTISTATIC

SPECIALITY

- ✓ Dry
- ✓ Antistatic

Anti-fatigue and antistatic mat offering the most efficient foam in the industry

- Examples of applications: server room, photocopier, electronic...
- Energizing Zedlan Plus foam combines flexibility and resilience for exceptional relief
- Static dissipative resistivity of 10^9 ohms per square protects your equipment against data damage or loss

MATS
2'x3' • 3'x5' • 3'x12'
Grounding cord included

ROLLS
2'x60' • 3'x60' • 4'x60' • 6'x60'

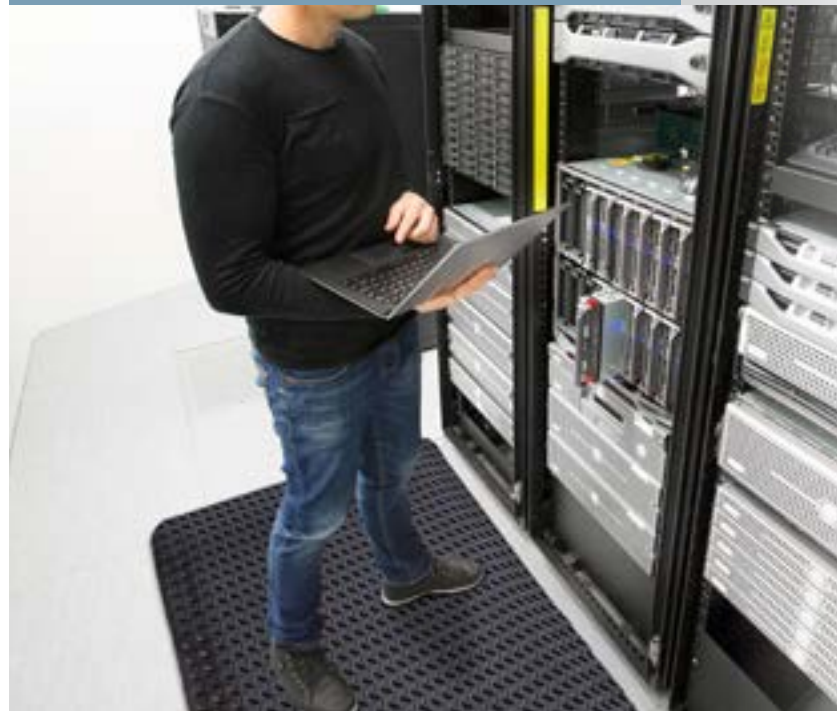

CUSTOM CUTS
Up to 6'x60'
Requires a grounding cord every 10' (sold separately)

FOAM Zedlan Plus
THICKNESS 3/8"
PROPRIÉTÉ ÉLECTRIQUE 10^9 ohms (Ω) per ASTM D 257

WARRANTY
Total confidence

ELECTRICALLY CONDUCTIVE DECK PLATE

SPECIALITY

- ✓ Dry
- ✓ Antistatic

Anti-fatigue and antistatic mat combining comfort and unparalleled durability

- Examples of applications: computer workstation, server room, electric room...
- PVC foam provides excellent anti-fatigue properties
- Static dissipative resistivity of 10^9 ohms per square protects your equipment against data damage or loss

WARRANTY 3 YEARS

YOUR SATISFACTION IS OUR PRIORITY

NO OTHER MAT WILL DO A BETTER JOB !

Our Performance, Prestige, Comfort+ and Pure Soft collections were developed to provide you with the best matting solutions within the marketplace, to reduce your maintenance costs and to ensure the health and safety of your employees and customers. We commit ourselves to replace your mats if they do not live up to our promises.

MANUFACTURER'S WARRANTY

Mat Tech guarantees its products against manufacturing defects for a period of 1 year if properly used and maintained per manufacturer's recommendations.

For more information, consult
www.mattech.ca

INSTRUCTIONS MAINTENANCE AND CLEANING

ENTRANCE MATTING

Regular maintenance is essential to prolong the appearance and efficiency of your mats. It is recommended to develop a maintenance schedule. The frequency will depend on the traffic and soil conditions.

INITIAL MAT USE

- 1 Mats should be unrolled and laid flat a few hours prior to use.
- 2 Normal shedding or “fuzzing” may appear on the surface of your new mat. This will disappear after a few vacuumings.
- 3 To store mats once fully cleaned, roll them into their original boxes. Store flat in heated area.

PERIODIC MAINTENANCE

Entrance mats are used to capture dirt and debris before it is tracked into your building. However, mats must be cleaned regularly to extend their usefulness and appearance.

- 1 Vacuum daily.
- 2 On a monthly basis summer use, apply a water-based carpet cleaner with sprayer and leave on for ten minutes. Extract surplus using a wet/dry vacuum.
- 3 On a weekly basis during peak winter use, apply a water-based carpet cleaner with sprayer and leave on for twenty minutes. Extract surplus using a carpet extractor or a wet/dry vacuum.
- 4 During peak winter use, if necessary, remove salt or ice melter stains using a salt neutralizer following the manufacturer’s instructions. Repeat if needed.

Important

Never use rotary scrubbers or other mechanical cleaners or scrubbers. Do not use solvents, pH detergents, or alkalis directly on the mat.

ERGONOMIC MATS

Regular maintenance is essential to prolong the appearance and efficiency of your mats. It is recommended to develop a maintenance schedule. The frequency will depend on the traffic and soil conditions.

INITIAL MAT USE

- 1 Mats should be unrolled and laid flat a few hours prior to use.
- 2 Always make sure the floor is clean and non-greasy before laying mats.

PERIODIC MAINTENANCE

Anti-fatigue mats for dry environments

While properly maintained, anti-fatigue mats offer optimal performance.

- 1 Shake or sweep daily to remove surface dirt.
- 2 Sweep the area underneath the mat of dirt and debris that could cause premature wear or loss of traction.
- 3 Mats should be cleaned with a damp mop using a pH neutral, non-abrasive detergent.
- 4 Allow the mat to completely dry before using.

Anti-fatigue mats for wet and oily environments

- 1 Shake or sweep daily to remove surface dirt.
- 2 Sweep and clean the area underneath the mat that could cause premature wear or loss of traction.
- 3 Mats can be cleaned with a pressure washer or gently scrubbed with a non-abrasive, water-based detergent.
- 4 Mats resistant to oils and greases must be occasionally cleaned with a water-based degreaser to eliminate excess oils. Never place in a commercial dishwasher.
